

	Activity	1	2	3	4
A	Identify the Project Requirements				
B	Identify the Project Scope				
C	Identify the Target Users of the Project				
D	Identify the Hardware and Software Specification of the Project				
E	Identify Related Systems				
F	Plan out Project Development				
G	Review Related Systems				
H	Gathering of Relevant Data (Interview/Observation)				
I	Analysis of Data Gathered				
J	Conceptualize the Interface				
K	Create Prototypes				
L	Evaluate Design and its Features				
M	Frontend Development				
N	Backend Development				
O	IoT Device Development (Sensor Setup, Circuit, Programming)				
P	Integration (System + IoT Device)				
Q	Testing and Debugging				
R	Hosting				
S	Deployment Fixes				
T	Execution and Implementation Testing				
U	Testing and Bug Fixes				
V	General Release				
W	Documentation
